We live in times that are characterised by a multiplicity of media: Traditional media like television, radio and newspapers remain important, but have all undergone fundamental change in the wake of digitalization.

New media have been emerging with an increasing speed: Internet platforms, mobile media and the many different software-based communication media we are recently confronted with as ‘apps’. This process is experiencing yet another boost from the ongoing and increasingly fast sequence of technological media innovations. In our modern social world, communication processes take place across a variety of media. As a consequence, we can no longer explain the influences of media by focusing on any one single medium, its content and possible effects. In order to explain how media changes are related to transformations in culture and society we have to take into account the cross-media character of communications.

In view of this, the book series ‘Transforming Communications’ is dedicated to cross-media communication research. It aims to support all kinds of research that are interested in processes of communication taking place across different kinds of media and that subsequently make media’s transformative potential accessible. With this profile, the series addresses a wide range of different areas of study: media production, representation and appropriation as well as media technologies and their use, all from a current as well as a historical perspective. The series ‘Transforming Communications’ lends itself to different kinds of publication within a wide range of theoretical and methodological backgrounds. The idea is to stimulate academic engagement in cross-media issues by supporting the publication of rigorous scholarly work, text books, and thematically focused volumes, whether theoretically or empirically oriented.

Contents

1 Media Logic or Media Logics? An Introduction to the Field
   Caja Thimm, Mario Anastasiadis
   and Jessica Einspanner-Pflock

Part I Theorizing Media Logics

2 The Media Syndrome and Reflexive Mediation
   David L. Altheide

3 Media Logic and the Mediatization Approach: A Good Partnership, a Mésalliance, or a Misunderstanding?
   Friedrich Krotz

4 The Logics of the Media and the Mediatized Conditions of Social Interaction
   Stig Hjarvard

5 Mediatization as Structural Couplings: Adapting to Media Logic(s)
   Mikkel Fugl Eskjær
### Contents

6  Media Technology and Media Logic(s): The Media Grammar Approach  
   Caja Thimm  
   111

7  Media Logic as (Inter)Action Logic—Interaction Interdependency as an Integrative Meta-Perspective  
   Katrin Döveling and Charlotte Knorr  
   133

Part II  Media Logic in Context: Politics, Journalism, Institutions

8  On the Media Logic of the State  
   Jens Schröter  
   159

9  Media Logic Revisited. The Concept of Social Media Logic as Alternative Framework to Study Politicians' Usage of Social Media During Election Times  
   Evelien D'heer  
   173

10  Perceived Media Logic: A Point of Reference for Mediatization  
    Daniel Nölleke and Andreas M. Scheu  
    195

11  News Media Logic 2.0—Assessing Commercial News Media Logic in Cross-Temporal and Cross-Channel Analysis  
    Maria Karidi  
    217

12  New(s) Challenges!—Old Patterns? Structural Transformation and TV News in a Mediatized World  
    Mirco Liebske  
    239

13  Algorithms and Digital Media: Measurement and Control in the Mathematical Projection of the Real  
    T. es Tomaz  
    265

Index  
   287

### Editors and Contributors

**About the Editors**

Caja Thimm, Ph.D. is Professor for Media Studies and Intermediality at the University of Bonn, Germany and Head of the project “Deliberation on the Net” which is part of the DFG priority program “Mediatized Worlds” (funded by the German Science Foundation). Her main research interests are online communication theory, social media, organizational, and political communication online.

Mario Anastasiadis, Ph.D. is scientific coordinator of the Graduate School “Digital Society” at the University of Bonn, Department of Media Studies, and research associate in the project “Deliberation on the Net,” which is part of the DFG priority program “Mediatized Worlds” (funded by the German Science Foundation). His main research interests are online communication theory, social media, political communication, and popular culture online.

Jessica Einspänner-Pflock, Ph.D. is a researcher and lecturer in the field of digital communication, i.e. political communication in social media and online privacy. She has published on the subject of Twitter in election campaigns, online PR, and adolescents’ sense of privacy in the digital world. Jessica received her Ph.D. from the University of Bonn, Germany, in 2015 in the area of Media Studies.
This volume provides new approaches to the concept of media logics – developed by Altheide and Snow – by drawing on theoretical and empirical perspectives from international scientists working in the field of communications, media, political science, and sociology. In an increasingly digitized and globalized world, powerful media structures and technologies influence our daily lives in many respects. It is not only mass media but ‘poly media channels’ that become more and more contextualized in everyday lives. Therefore, it is necessary to revisit the theory of media logics, which focuses on the strong intercorrelation of media technologies, media institutions and media power. Media Logic(s) Revisited attends to this by critically reflecting on the idea of media logic, a much needed input in light of current developments and strong cultural embedding of media in various social contexts.
